CSIS Indonesia

REMARKS FROM THE EXECUTIVE DIRECTOR

Yose Rizal Damuri

Executive Director of CSIS

In 2021, CSIS celebrated its 50th anniversary, marking a significant milestone in the long journey undertaken by one of Indonesia's oldest research institutions. Various achievements and contributions made by this institution are well documented in the book "50 Years of CSIS: Ideas and Policy in Indonesia" by Peter McCawley. Over the year, CSIS has successfully established itself as a renowned intellectual institution not only in Indonesia but also on the international stage, playing a pivotal role intellectual discussions to influence policy-making.

Moreover, the anniversary also signifies the need for CSIS to continue its activities in addressing various challenges of an increasingly complex world. A year prior to the celebration, the world faced challenging times with the spread of the Covid-19 virus, whose impacts extended far beyond health issues and are still felt today. Rapid technological advancements have brought forth undesirable implications, along with numerous opportunities. Furthermore, the world is also currently grappling with significant issues temming from climate change, necessitating diverse approaches to address them.

Now two years after the celebration, CSIS continues to evolve to meet these challenges. CSIS has been giving attention to emerging "new" issues that we deem crucial and strategics. In recent years, CSIS has initiated research units related to climate change and disaster management, complementing extensive research in the fields of economics, politics, and international relations. Looking ahead, new research units may be established to provide a multidisciplinary perspective on these emerging issues, while still placing them under CSIS's focus of strategic issues.

Additionally, CSIS is committed to enhancing its capacity for research activities and stakeholder engagement. Currently, two-thirds of CSIS researchers are under the age of 40, holding advanced degrees (Master's and Ph.D.) from various renowned global universities. These young researchers continually enhance their skills with cutting-edge analytical tools through various training sessions and workshops. Equally important is the development of communication skills to effectively convey research findings to both public and policymakers.

To support these activities, CSIS continues to build its research infrastructure. The intensified use of digital platforms for research purposes and stakeholders engagement is a notable focus. The CSIS Auditorium, frequently utilized for discussions, has also been upgraded to enhance the overall experience.

All these endeavours would not be achievable without support from various stakeholders, both domestically and internationally. Moving forward, we hope that this support will grow to ensure the successful CSIS activities, to contribute better to the community.

CSIS TODAY

"1st Think-tank institution in South & Southeast Asia and the Pasific"

– The 2018 Global Go To Think Tank Index

"Top 50 Think-tanks Worlwide (Non-US)"

– The 2020 Global Go To Think Tank Index

"CSIS stands as an indispensable institution, not only for Indonesia, but for the world. When experts abroad want to know what is happening in Indonesia and the factors shaping Indonesia's global engagement, CSIS is the first stop."

– Brian Harding, Senior Expert, Southeast Asia, U.S. Institute of Peace

"CSIS has actively connected policy makers and civil society representatives as ASEAN embarked on its community building. CSIS saw the pressing need for ASEAN to become more people-oriented and socio-culturally attuned, and not just a grouping for political, security and economic cooperation."

– Ong Keng Yong, Secretary General of ASEAN 2003-2007

"CSIS has successfully positioned itself as one of the foremost research institutions globally, consistently delivering strategic contributions to Indonesia, the Southeast Asian region, the Asia-Pacific, and the global arena."

– Andi Widjajanto, Governor of National Resilience Institute (Lemhannas) 2016-2022

"CSIS plays a pivotal role in shaping Indonesia's domestic political landscape, as well as its external political image on the global stage."

– Siti Nurbaya Bakar, The Minister of Environment and Forestry, Republic of Indonesia

OUR MISSION

Our mission is to contribute to improved policy making through policy-oriented research, dialogue, and public debate. This is based on the belief that long-term planning and vision for Indonesia and the region must be based on an in-depth understanding of economic, political, and social issues, including regional and international developments. CSIS research and studies are channelled in various forms as independent input to government, universities and research institutions, civil society organizations, media, and business.

Knowledge

We are dedicated to the pursuit and dissemination of knowledge. Recognizing the ever-evolving nature of strategic and international studies, we strive for continuous learning and improvement. Through rigorous research, analysis, and staying abreast of global developments, we aim to contribute valuable insights and foster intellectual growth.

Inclusivity

We embrace diversity and inclusivity in all aspects of our programs and works. We believe that diverse perspectives lead to comprehensive and well-rounded analyses. Our commitment to inclusivity extends beyond our team to the global stage, ensuring that our research and initiatives consider a wide range of perspectives, cultures, and voices.

Perseverance

We embody the value of perseverance in all our endeavours. Our commitment to perseverance has shaped our work culture and actions in the beliefs of determination, resilience, and persistence to overcome any hurdles and achieve the goals, as well as embracing opportunities for continuous growth.

Impact

Our work is centered around people, and we are committed to create tangible and positive impacts on society at large. We uphold the aspirations and needs of individuals, communities, and society, and make sure that our works is accessible for all.

CSIS HISTORY

Founded in 1971, the Centre for Strategic and International Studies (CSIS) has won recognition as an important research and policy institution both within Indonesia and internationally. Its development over more than five decades is entwined with the history of Indonesia itself.

The Beginnings

The origins of CSIS lie in discussions and activities in the 1960s undertaken independently by two groups of Indonesian scholars, which comprise of a number of Indonesian graduate students studying abroad and a group of activists within Indonesia. Given the turmoil in Indonesia at that time, both were convinced that insufficient attention was being given to strategic and international studies within Indonesia.

CSIS was established on 1 September 1971. It had the support of the late Ali Moertopo and Soedjono Hoemardani, then personal assistants to the newly elected President Soeharto, and a corporate body, Yayasan Proklamasi (Proclamation Foundation), established to raise the necessary funding. The fledgling organisation numbered six academic staff members and a number of supporting staff. With rapid expansion in its staff and activities, CSIS quickly outgrew its initial accommodation. Its present building was constructed in 1973 and extended in 1983.

International Outlook

In addition to its core studies in domestic economic and political developments, CSIS has also progressively developed a more international orientation. Bilateral conferences have been organised with a wide range of countries, **among others China, US, Japan, South Korea, Australia, NZ, UK, Germany**. These have provided the opportunity for dialogue and cooperation in research with individuals in parallel institutions (including government officials in a private capacity) as well as for providing input to foreign policy development within Indonesia. Since the 1980s CSIS has also increasingly contributed to multilateral regional institutions. These include think tank networks, such as the ASEAN Institutes of Strategic and International Studies (ISIS), the Pacific Economic Cooperation Council (PECC) and the Council for Security Cooperation in Asia Pacific (CSCAP). All these multilateral regional institutions aim at enhancing cooperation in the Indo-Pacific region.

Growing Diversity of Audience

Since its establishment, CSIS has seen its basic mission in terms of being a vehicle for new and independent ideas particularly within Indonesia. In an era of centralised policy making in the early Soeharto years, this meant (apart from general public education) more of a focus on providing policy advice and ideas direct to government.

With changing developments within Indonesia, CSIS audiences have become steadily more diverse, particularly through the growth in influence of NGOs, civil society groups and the media. Many CSIS staff members also share their knowledge and experience through participation in a range of civil society organizations, including on gender, pluralism, democracy, and governance, and by devoting some of their time to teaching at local universities.

LOGO PHILOSOPHY

CSIS Logo in Bronze

Originally designed by G. Sidharta

Nalar Ajar Terusan Budi

The original logo, in bronze, was designed by renowned Indonesian sculptor G. Sidharta. The main elements of the logo - the disc with an engraving of the globe, the youth with an open book on a cloth draped across his lap - combine to project the Centre's nature as an institution, where people think, learn, and share their knowledge. Humanity is their concern and the world their horizon. The youth's bared torso symbolises open-mindedness and the absence of prejudice in the attitude of the scholars who work at the Centre.

The Javanese inscription on the disc, **"Nalar Ajar Terusan Budi"**, conveys the Centre's belief that "to think and share knowledge are the natural consequences of an enlightened mind". It is surya sengkala that is chandra sengkala – a Javanese traditional way to symbolise a memorable year in the lunar calendar, adapted to the solar calendar system. These words express the perceived meaning of the commemorated year of CSIS establishment (1971), with each word having a numerical value.

DEPARTMENT OF ECONOMICS

The overall objective of our policy-oriented studies is to support the development of a sustainable economy in Indonesia-characterized by rapid, shared, participatory and environmentally friendly growth, the development of an open and competitive economic system. Our research also supports economic development in the global economy and the promotion of social justice, equity, and equality for the society.

In the last couple of years, the Department of Economics have strengthened its core areas such as international economic cooperation, trade, and industrial policy. We expanded our expertise in emerging issues such as digital economy including financial technology, digital skills, and climate policy.

Highlighted Research Projects

Policy Direction and Stakeholder Mapping Toward Indonesia's Economic Decarbonization: Strategic Economic Sectors of Trade, Industry, and Investment

The study focus Indonesia's policy direction in response to climate crisis in line with the Paris Agreement. By using qualitative and quantitative analysis, it highlights the inadequacy of Indonesia's policy settings to achieve more effective economic decarbonization in industry, trade and investment sectors.

Grand Strategy of Indonesia's International Economic Cooperation

As Indonesia has been actively engaged with many international economic cooperations, the research aims to have a review on the utilization of Indonesia's free trade agreements (FTAs) and come up with grand strategy for the medium and long-term national planning. It also includes a firm survey to evaluate Indonesia's position and capture the firms' aspiration for the future's policy direction.

Economic Impacts of Local Content Requirements in Indonesia

The objective of the study is to examine the impact of local content policy in Indonesia and to see whether the implementation of LCRs achieves government-held objectives. The study utilised quantitative approach using the latest available data and conducted in-depth interviews and focus group discussions with key stakeholders from both public and private sectors.

AREA OF FOCUS

International Economic Cooperation

This area encompasses research on multilateral and regional economic agreements, foreign and domestic trade policies, and their impacts on the Indonesian economy. It seeks to ensure that the country's foreign economic cooperation is carried out effectively in reaching sustainable economic growth.

Trade and Industrial Policies

Aimed for the development of competition-based trade and industrial policies that are comprehensive, consistent, non-discriminatory, transparent, and accountable. The area covers labor market development, the social impacts of economic development, advancements in the industrial sector, economic productivity enhancement, and efforts toward the development and transformation of Indonesia's economy.

Digitalisation and New Sources of Economic Growth

This area covers the economic and social impacts of digital technology adoption, challenges in the process of adopting digital technology, and developments in the e-commerce, financial technology, and digital industrialization sectors.

Climate Change

This focus area covers policies for mitigating and adapting to the impacts of climate change, disaster management, development of green industries, transition to new and renewable energy, the impacts of climate policies on international economic and trade policies, and sustainable and environmentally friendly economic growth.

Institutional Economic Policies

The focus is on the development of a sound institutional framework for the economy, including public and corporate governance, legal and regulatory issues, and the development of institutional capacity in the country to reduce transaction costs, create efficient incentive system, and promote transparency and accountability.

DEPARTMENT OF INTERNATIONAL RELATIONS

International and security issues in the immediate areas of Indonesia's interests—including ASEAN and Southeast Asia, East Asia, and the Indo-Pacific continue to be the main focus of CSIS' Department of International Relations.

Highlighted Research Projects

Indonesia's Leadership in ASEAN

This research program serves as a preliminary study aimed at providing recommendations to domestic stakeholders regarding priority issues for Indonesia's ASEAN Chairmanship in 2023. This research was published into two working papers, discussing domestic and regional aspirations for Indonesia's role in ASEAN, respectively.

Understanding and Strengthening EU Foreign & Security Policy in a Complex and Contested World

This project combines research and public opinion analysis to examine the dynamics of the European Union's foreign and security policy. This project addresses how the bloc could create a unified and sustainable foreign and security policy architecture.

Enhancing Security Cooperation between Maritime Southeast Asia and Republic of Korea under the New Southern Policy Plus

This research aims to provide insights into security policy gaps between the maritime Southeast Asian countries and the Republic of Korea. The study has resulted in an edited volume that encompasses various perspectives from Southeast Asian and South Korean academics on enhancing and deepening maritime cooperation between the two parties.

National Early-Warning Violence Monitoring System

This research project is an ongoing project since the past two years in an effort to monitor collective violence incidents in a real-time manner. Collective violence monitoring is a crucial mitigation measure against risk factors of atrocity crimes. This research findings could be directly accessed through violence.csis.or.id in real time.

AREA OF FOCUS

Maritime Issues

Our research emphasis has been placed on various aspects related to maritime, ranging from maritime security, maritime safety, regional cooperation on maritime-related issues, Indonesia's new concept of Global Maritime Fulcrum, to maritime defence.

South China Sea

As an extension of our portfolio on maritime issues, CSIS has been involved in many projects related to the issues of South China Sea, as territorial disputes in the South China Sea are at the heart of increasing tensions in Southeast Asia.

Indonesia's Foreign Policy

CSIS has greatly contributed towards Indonesian government by offering policy advice and by building bridges to policy-making counterparts abroad, particularly in Southeast Asia, the wider East Asia, South Asia, Australia and New Zealand, North America and Europe. As CSIS strength lies on strategic and security issues, and bilateral and multilateral cooperation, we have started to build expertise on international development cooperation since 2013.

ASEAN and East Asia Regionalism

As the founder of the Track Two diplomacy of ASEAN think tanks, the ASEAN ISIS, CSIS scholars publish regularly on ASEAN issues, and are extensively sought after as resource persons on issues related to ASEAN and Southeast Asia, as well as China and Indonesia-China relations.

Strategic and Security Issues

The country's foreign policy agenda is always shaped, first and foremost, by the need to protect the nation's vital interests and national sovereignty from external threats. In a rapidly shifting geostrategic environment, the external threats facing Indonesia can be expected to be many and complex. Thus, various research from these issues stems widely from the rise of China as an economic and military superpower and its ramifications on the existing balance of power in the region and the world, to the non-traditional security issues including, for instance, terrorism and piracy.

DEPARTMENT OF POLITICS & SOCIAL CHANGE

In Domestic Politics and Development, CSIS engages in comprehensive research areas, including election dynamics, parliament studies, information resilience, and urban politics, aiming to enhance the quality of governance and foster youth participation. The cluster dedicated to Papua, Conflict, and Development focuses on understanding ethnic and minority issues, particularly in Papua, contributing nuanced insights into the region's socio-political landscape. Additionally, the Governance and Law cluster adopts a holistic approach to transform the security sector and improve governance.

Highlighted Research Projects

Strategic Exploration on the Nexus of Development and Conflict in Papua

Papua's separatist conflict, which involved the Papuan Armed Criminal Group (KKB Papua), also known as the National West Papua National Army-Free Papua Organization (TNPB-OPM), is now Indonesia's longest-running conflict. This study aims to analyse how the escalation of the Papuan KKB separatist conflict is affected by the implementation of Jakarta's development approach. More specifically, to review the effectiveness of the development approach and support improvements in policy effectiveness in dealing with the complexities of problems in Papua. The goal of this project is to improve understanding and awareness of the development security nexus and community protection issues in Papua among policymakers and other stakeholders.

Young Voters and Strengthening Democracy

CSIS has published one national survey result concerning youth in 2022, as well as focusing on significant project to strengthen democracy. This project addresses both internal challenges such as political polarization, misinformation, and electoral issues, ensuring a more inclusive and vibrant political landscape, and external challenges such as great power rivalry and fragmented globalization. By creating an inclusive political environment, the program endeavours to empower voters, especially young voters, with accurate and trustworthy information while enhancing the transparency and fairness of the electoral process.

Information Disorder and Its Impact on Democracy

This project also represents the 'Domestic Politics and Development' cluster. CSIS under the Department of Politics and Social Change, in collaboration with Google Indonesia, is developing a project known as Safer Internet Lab (SAIL). This project aims to address information disorder during elections. Divided into three working groups, SAIL seeks to analyse information disorder based on platforms, actors, and users. SAIL has published a survey on information disorder surrounding election, also an academic conference 'Konferensi Ilmu Sosial dan Ilmu Politik' (KISIP) with the theme "Safeguarding Democracy: Multifaceted Responses to Election Disinformation".

AREA OF FOCUS

Domestic Politics and Development

CSIS contribute to the discourse on domestic politics and its profound impact on developmental landscapes by conducting research, providing policy recommendations, and fostering public awareness and understanding. Delve into sub-clusters, such as election and political parties, parliament study, information resilience, and urban politics. The initiative strives to elevate the quality of incoming parliament members, promoting checks and balances. It advocates for a youth parliament caucus, fostering policy discussions on contemporary urban issues. The program integrates political education into literacy efforts and emphasizes clear coordination for an effective information ecosystem. Furthermore, it encourages discourse on pressing matters like climate change, digital transformation, creative hubs, and employment in urban communities, especially in the context of local elections.

Papua, Conflict, and Development

The expertise of CSIS encompasses research projects on ethnic and minority issues, with a particular emphasis on Papua. Papua has encountered challenges related to autonomy, indigenous rights, social and economic inequality, as well as conflicts and violence. This specific area of focus aims to analyse the dynamics of conflict and development, contributing to a nuanced understanding of the socio-political landscape in this region.

Governance and Law

This area of focus encompasses a comprehensive approach, aiming to drive transformation in the security sector and enhance governance. It involves detailed analyses and mapping exercises focused on executive powers in legislation, defence security, and overall government functions. Simultaneously, efforts are directed towards improving the quality of education and healthcare, ensuring the neutrality of civil servants, and conducting mapping and analyses of the behaviour of judges, court decisions, and the legal-political landscape of legislation. This multifaceted strategy seeks to contribute to informed governance, security sector improvement, and overall societal well-being.

Units in CSIS

Climate Policy Research Unit

The Climate Policy Research Unit (CPRU), launched in 2021, signifies the elevated status of climate change as a pivotal and cross-cutting concern in the policy making process in Indonesia. CSIS' unique character of accumulated capacity in study of economics, foreign policies, and politics and social changes makes the Unit multidisciplinary in nature.

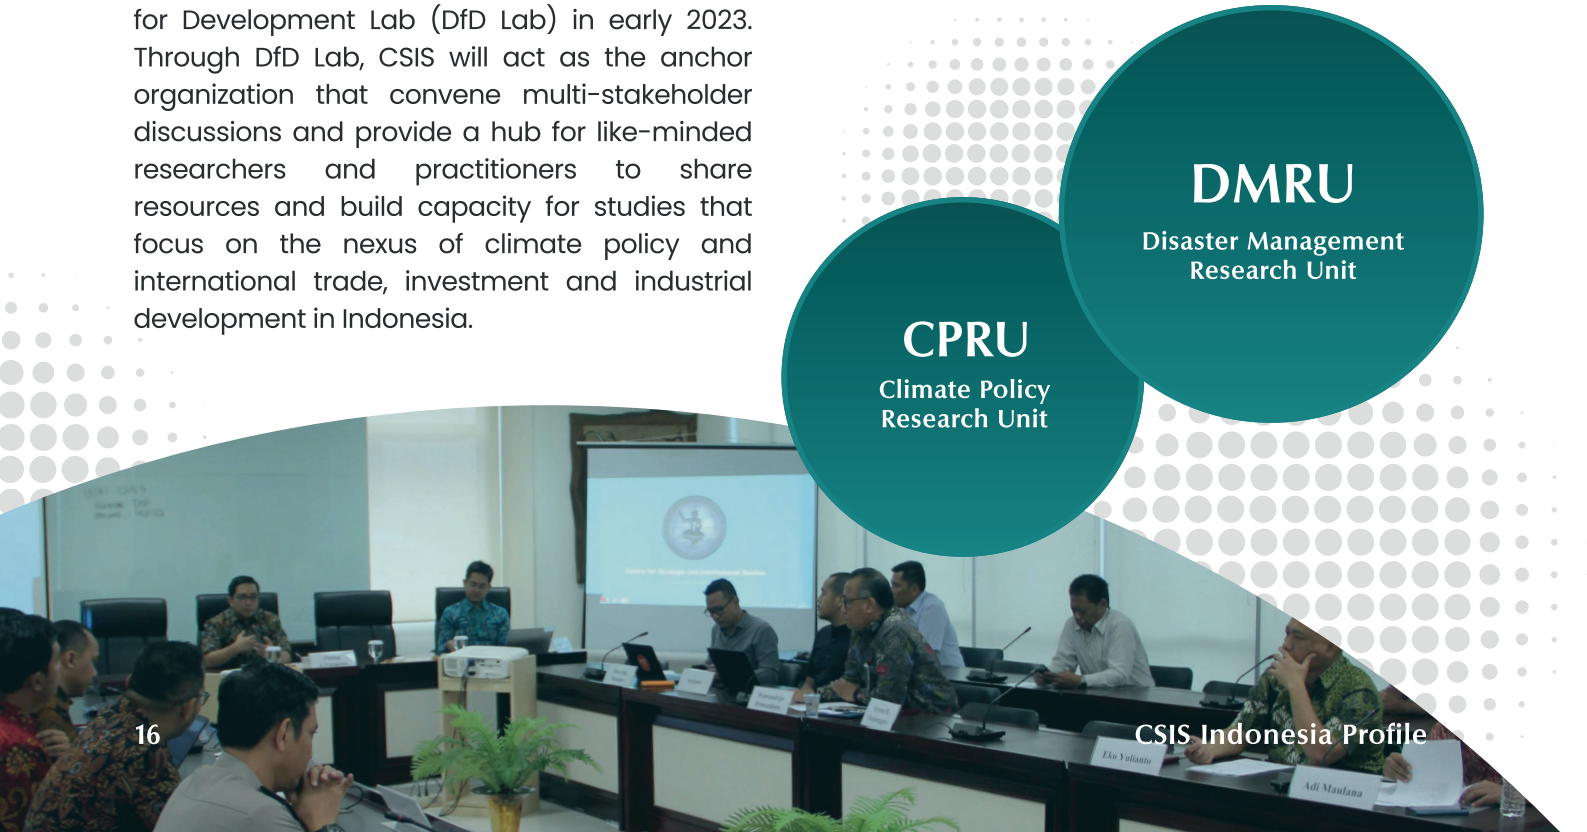

By its third year, the CSIS Climate Policy Research Unit has completed and contributed to three major study reports, namely (i) **Policy Direction and Stakeholder mapping Toward Indonesia's Economic Decarbonization: Strategic Economic Sectors of Trade, Industry, and Investment**; (ii) **Ekonomi Hijau dalam Visi Indonesia 2045 (Green Economy in the Indonesia 2045 Vision)**; and (iii) **Industry for Tomorrow: Towards ESG Implementation in Indonesia**. The most recent report is about the risks and challenges the Indonesia's Just Energy Transition Partnership (JETP) is facing.

Using these studies as building blocks and having a strong belief that Indonesia's economy would benefit from a holistic study of climate-relevant economic policy, the Unit kickstarted and hosted a platform called Decarbonization for Development Lab (DfD Lab) in early 2023. Through DfD Lab, CSIS will act as the anchor organization that convene multi-stakeholder discussions and provide a hub for like-minded researchers and practitioners to share resources and build capacity for studies that focus on the nexus of climate policy and international trade, investment and industrial development in Indonesia.

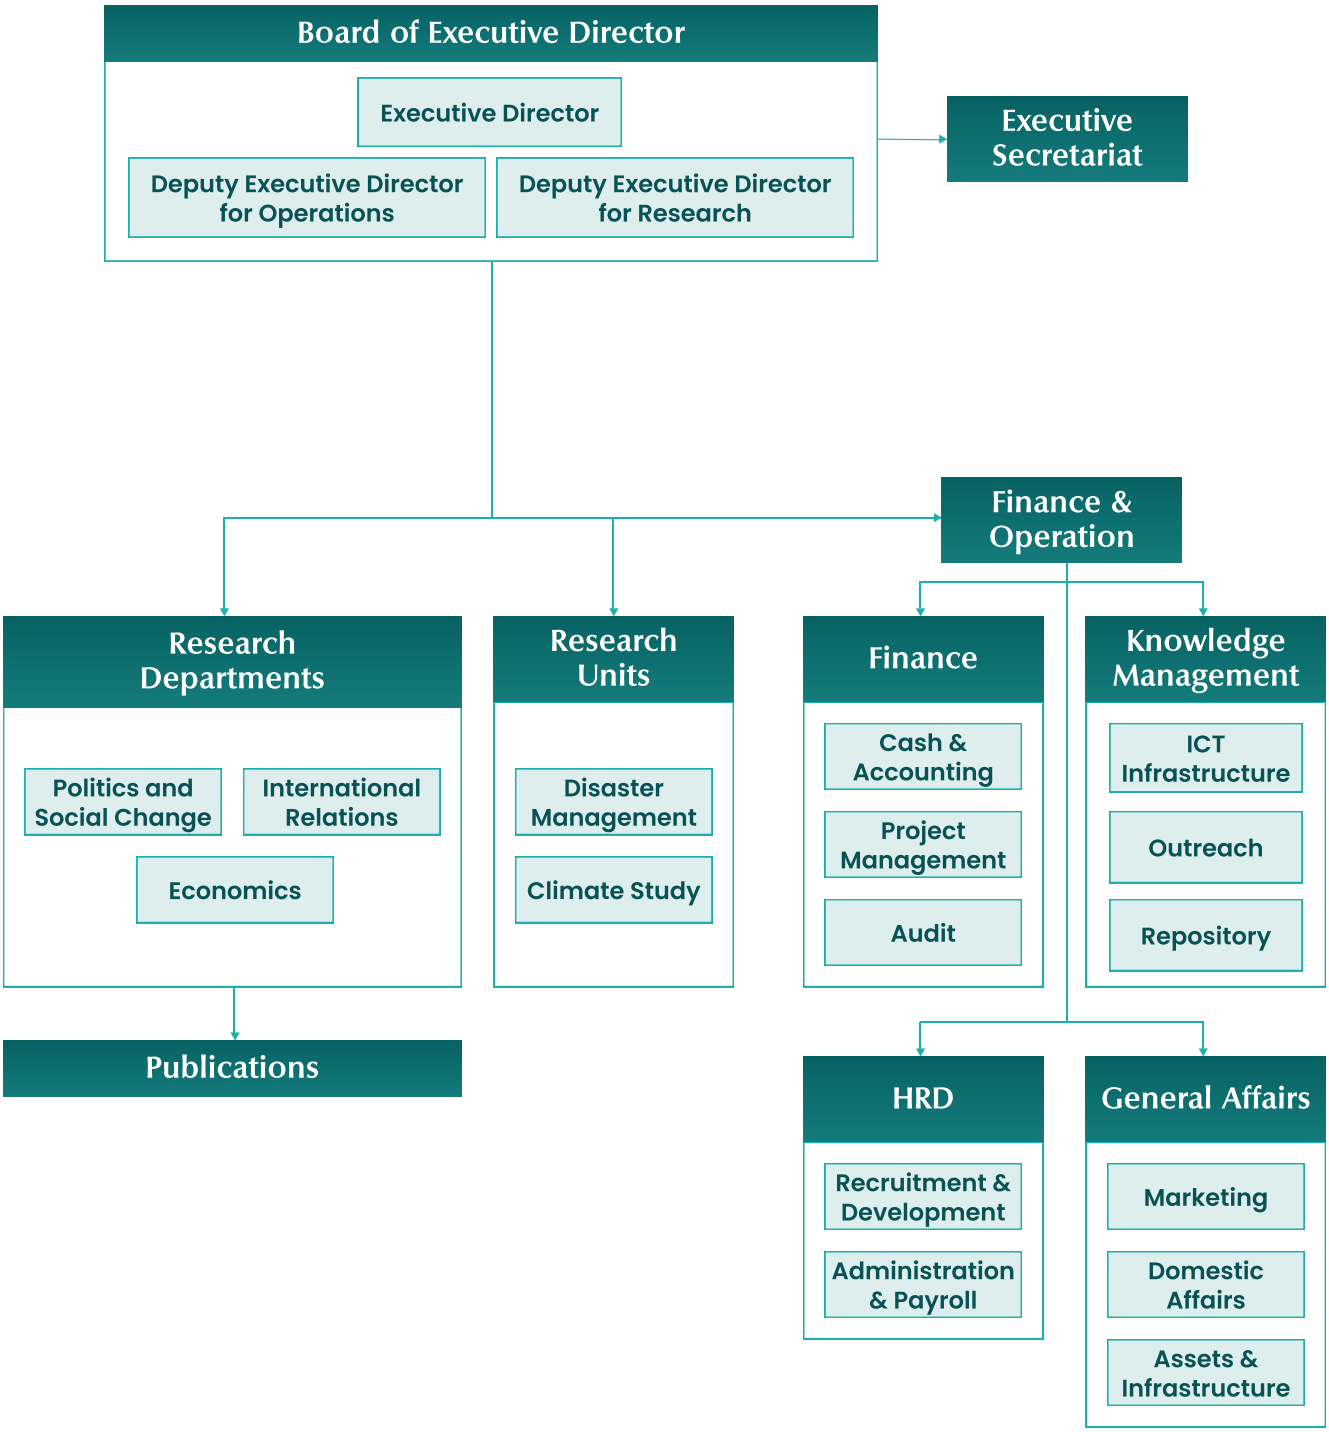

Disaster Management Research Unit

The Disaster Management Research Unit (DMRU) stands as a formidable multi-disciplinary research entity, embodying a policy-oriented approach and fostering a strategic perspective on disaster management. Established in the aftermath of the devastating events in Central Sulawesi in 2018, the unit was a response to the stark reality that more Indonesians perished due to disasters than wars. Under the leadership of Former Executive Director Philips J. Vermonte, DMRU has evolved into a pivotal player in disaster resilience.

Recognized as a Knowledge Partner of the 2020 ASEAN High-Level Symposium on Disaster Management, the unit has demonstrated its commitment to regional collaboration and information exchange. The DMRU has solidified its standing through formal agreements, boasting both a Memorandum of Understanding and Cooperative Agreement with the National Disaster Management Agency (BNPB), showcasing its integral role in shaping and implementing disaster management policies at both national and regional levels.

CSIS Commentaries

CSIS Publications

Indonesian Quarterly & Analisis CSIS

Indonesian Quarterly (IQ) and Analisis CSIS are peer-reviewed policy-oriented journals and a medium for research findings, evaluations, and views of scholars, and thinkers on issues related to Indonesia and its political, economic, and strategic challenges since 1971.

With a strong emphasis on rigorous analysis, interdisciplinary approaches, and policy relevance, IQ and Analisis CSIS welcome submissions from various disciplines, including economics, political science, international relations, social sciences, and more. Articles published under the Indonesian Quarterly and Analisis CSIS examine Indonesia's economic development, political dynamics, social challenges, environmental sustainability, or other pressing strategic issues, combined with a production of a policy-oriented analysis with the aim of offering actionable insights.

CSIS Commentaries

To address burning issues, CSIS published CSIS Commentaries as a platform where policy researchers and analysts can present their timely analysis on various strategic issues of interest, from economics, domestic political, to regional affairs. The opinions expressed in CSIS Commentaries are those of their authors and do not necessarily reflect the opinion of CSIS. Finally, CSIS Working Paper, CSIS Policy Brief and CSIS Notes are served as platforms for researchers to contribute to academic and policy discussion.

CSIS Digital Presence

In a time when information and technology are increasingly integrating, CSIS sustains a robust and strategically curated digital presence, embodying excellence and innovation in the digital realm.

Our multifaceted online strategy seamlessly integrates cutting-edge technologies, comprehensive content, an audience and user-centric approach to amplifying knowledge outreach and maintain relevance.

Knowledge Beyond Borders:
CSIS' Strategic Content Dissemination

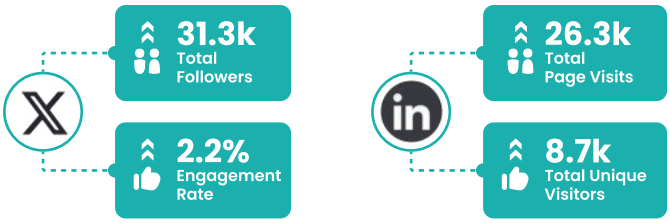

The digital presence of CSIS is present on Facebook, Youtube, Linkedin, Instagram, and X (Twitter).

CSIS acknowledges the potential of digital presence in social media and websites as a dynamic platform for involvement, collaboration, and communication.

It is an extension of our dedication to free interaction, the sharing of knowledge, and community development. We cultivate deep connections with our audience by deploying material strategically and interacting with them in real time.

CSIS recorded a **294.9% rise in reach** on Instagram in 2023, along with a **196.1% increase in engagement** and a **106.9% increase in profile visits** from users in Indonesia's top cities and beyond. Additionally, CSIS raised **engagement by 113.6% and post reach on Facebook by 184.8%.**

With a total of 31.3K followers, CSIS consistently achieved a **2.2% engagement rate** on X (Twitter) every quarter. This was done on purpose to extend our organisational principles by promoting meaningful connections and the dissemination of knowledge to the public. CSIS is actively involved in cooperative research projects and digital studies. By collaborations with educational establishments and involvement in cutting-edge digital research initiatives on Linkedin, which resulted in **26.3K page visits** and **8.7K unique visitors**.

On the other hand, the CSIS website functions as a pivotal hub for multidisciplinary research resources, attracting approximately **103,000 website visitors** from Indonesia and various regions in 2023. This online platform serves as a comprehensive repository, offering access to all CSIS research projects and publications. Additionally, it features dashboards addressing timely and pressing issues. Beyond a mere information source, the website plays a central role in keeping various stakeholders informed and fostering scholarly engagement in the digital sphere.

CSIS Fellowship and Internship

The fellowship and internship programs at CSIS aim to provide students and academic scholars with an opportunity to work and conduct research on issues pertinent to Indonesia. Visiting fellowships are mainly targeted to facilitate researchers/students who are completing their PhD theses. On special consideration, CSIS may host university professors and senior staff members of international institutions to take advantage of the resources the Centre has to offer including interactions with CSIS researchers. CSIS hosts more than four visiting fellows annually.

CSIS currently maintains a vibrant internship program. Interns participate in a variety of activities that support individual programs, including research, writing, event organizer, and project development. Interns enjoy mentoring process from CSIS researchers either through collective workshops or intimate consultations. The internship program runs regularly every season: Spring (Jan-Apr), Summer (May - Aug), Fall (Sept-Dec). CSIS welcomes more than 20 interns annually.

Workshop by CSIS for Internship Spring Period 2024

CSIS Visiting Fellow in 2023

- **John Bradford** is the inaugural Council on Foreign Relations Fellow in Indonesia, presented its research on "Anticipating Open Conflict in the Taiwan Strait: Scenarios for Indonesia, ASEAN, and the Indo-Pacific?".

- **Stéphanie Martel** is an Assistant Professor in the Department of Political Studies, Director of the Centre of International and Defence Policy, and Distinguished Fellow at the Asia-Pacific Foundation of Canada, presented CSIS lecture series on regional dynamics "The Future of ASEAN Security Community".
